

Polina Ilieva, UCSF Archives & Special Collections

STORY OF A GLASS EYE

UCSF 150 YEARS

University
of
California -
“the power
of public”
campaign

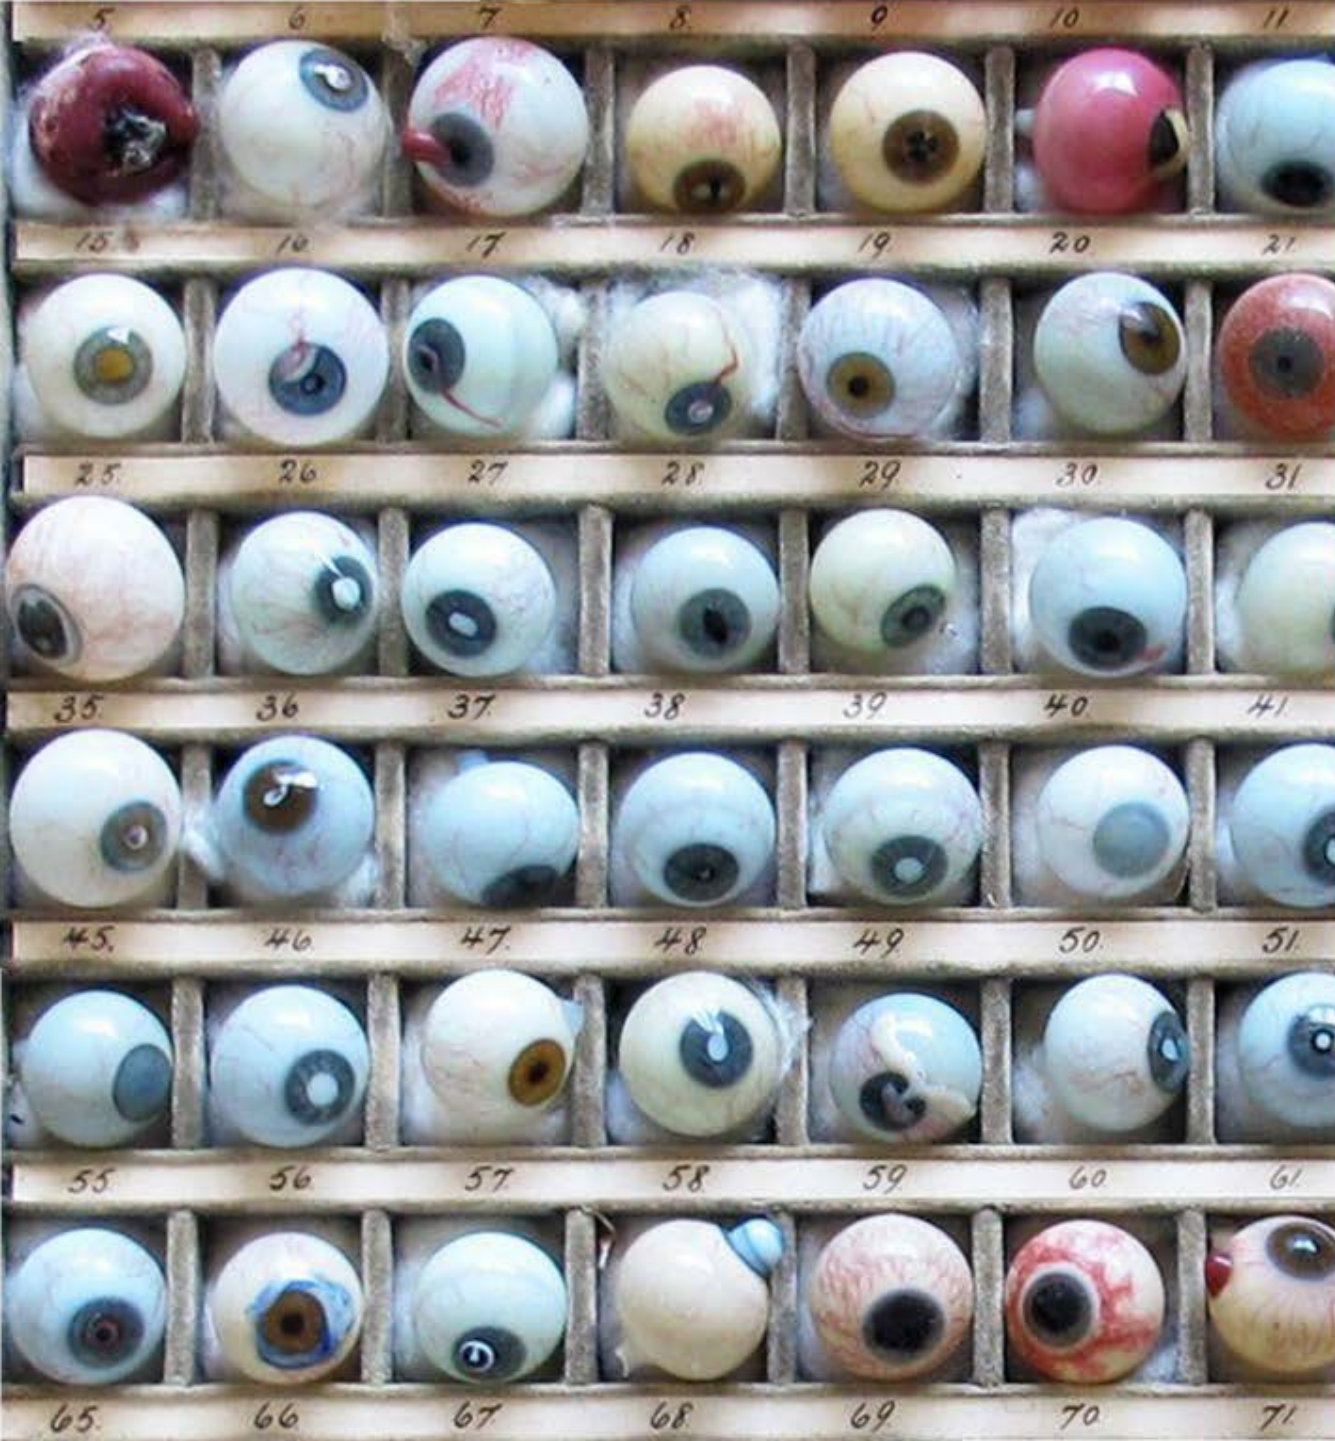

UCSF LIBRARY

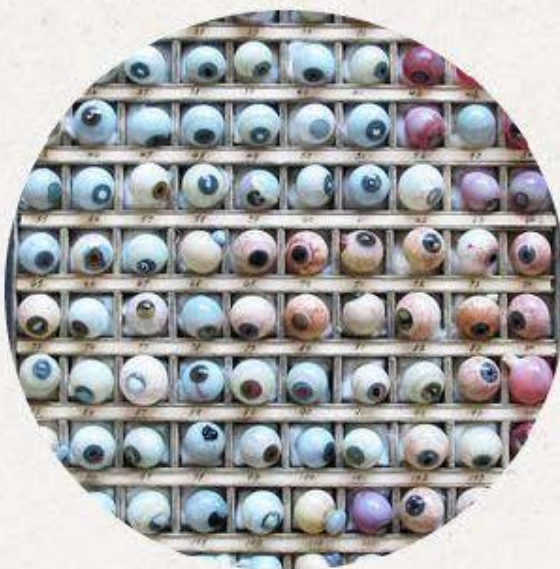

Medicine chests were once things of beauty: hand-written labels, silver leaf coatings for pills, delicate bottles. Head archivist Polina Ilieva takes us back with a collection of intact 19th century medications.

The libraries at UCSF aren't just for aspiring doctors and researchers to stay on top of current research. In its Archives and Special Collections, UCSF is home to some extraordinary artifacts from the history of medicine: rare books about medical history, historical medical equipment, and the country's preeminent collection documenting the history of the HIV/AIDS epidemic.
